### MOLECULAR DIAGNOSTICS

Flag	Results	Reference	Units
SARS-COV-2-NAAT-NASOPHARYNGEAL			
2019 Novel Coronavirus by RT-PCR			
Interpretation: COVID-19 virus NOT detected by real-time PCR.			
A negative result does not preclude SARS-COV-2 infection and should not be used as the sole basis for patient management decisions. In case of unexpected results, a negative result must be combined with clinical observations, patient history and epidemiological information.			

Please remember any medical laboratory test results should always be interpreted by Doctor or Nurse Practitioner in conjunction with other factors.
